

**SNIPER WATCH**  
INTELLIGENCE. SECURITY. SAFETY.

# ELIMINATE CYBERSECURITY RISK

# Next-Generation Network & Cybersecurity

CORPORATE OVERVIEW

## Why Sniper Watch?

It is our mission to help organizations protect and grow their revenue by eliminating cyber risk.

### WHO WE ARE

Sniper Watch stops cyberattacks with our cloud-delivered, comprehensive infrastructure & cybersecurity platform so our clients can drive more revenue.

### WHAT WE DO

We deliver complete, ongoing secure infrastructure hardening, cloud-delivered network & security, managed services, threat hunting, managed detection & response, technology alignment, and vCISO.

### HOW WE DO IT

We do things differently. Our integrated "security that works together" approach reduces risk, breaches, operational disruption, revenue loss and brand defamation.

# Partial Security is Not Security

## How our client-to-cloud secure ecosystem impacts teams that make money

Every organization has different technology needs and there is no silver bullet to protecting your company. At Sniper Watch, we understand the modern threat landscape and the impact it has on your business.

Attacks occur every 39 seconds and organizations require a multi-layered defense with a security that works together cybersecurity strategy. Malware attacks have increased by 358%, Ransomware, or Extortion attacks, have increased by 435%, and malicious behavior-based attacks have increased by 653% in the past year.

Sniper Watch executes unique and customized solutions by analyzing overall technical business Cybersecurity Risk, and deployment of best in class services. Our cloud-delivered infrastructure strengthens our client's security posture and digital transformation experience to stop breaches before they materialize. As organizations adopt cloud-based SaaS solutions, which extends the company's attack surface, we have the ability to detect anomalous activity on-premise or within the cloud architecture and stop a potential threat at the root. Additionally, our clients benefit from feature enhancements, upgrades, and ongoing management in order to execute frictionless delivery of solutions & services, resulting in optimal digital experiences, operational consistency, and business continuity.

Your future is changing. Change with it.

Be one step ahead.

## SOLUTIONS

### NETWORK SECURITY

- Software-Defined WAN
- Software-Defined Networking
- Next-Generation Firewall
- Extended Detection & Response
- Zero Trust Network Access
- Network Access Control
- Identity Access Management
- Email Security
- Wireless 5G | LTE | WiFi 6
- User Entity Behavior Analytics
- Macro | Micro Segmentation
- Single Sign-On
- Multifactor Authentication
- Passwordless Security
- Ransomware Protection
- Behavior & Anomaly Detection
- Intrusion Detection & Response
- Malware Analysis & Sandboxing
- Internet of Things Security
- Data Loss Prevention
- Datacenter Security
- Deception Security

### CLOUD SECURITY

- Cloud Access Security Broker
- DNS Security
- Application Security
- Threat Hunting
- Forensics Security
- Virtual Private Networking
- Remote Workforce
- Hybrid Multi-Cloud
- Container Security
- Network Performance
- Digital Experience
- Artificial Intelligence
- Machine Learning
- Behavior Analytics
- Automation

## SOLUTIONS

### SECURITY OPERATIONS

- SIEM
- SOAR
- XDR
- SOCaaS
- Threat Hunting
- Mobile Security
- Data Encryption/Decryption
- Dark Web Monitoring
- Behavior Testing
- Security Awareness Training
- Helpdesk Support
- Patch Management
- Backup & Disaster Recovery
- Automation
- Monitoring
- Vendor Management
- Password Management
- Compliance Management
- Regulatory Management

## SERVICES

### PROFESSIONAL SERVICES

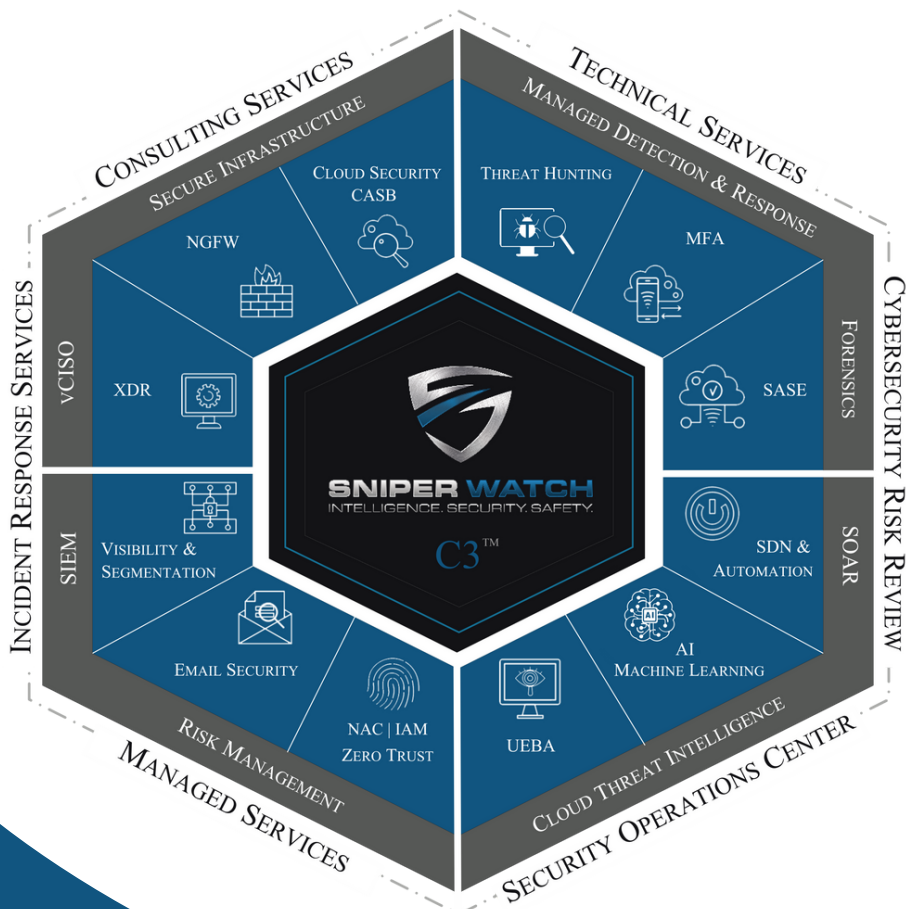

- Technical Services (TS)
- Consulting Services (CS)
- Cybersecurity Risk Assessment (CRA)

### MANAGED SERVICES

- Managed Services (MS)
- Managed Security Services Provider (MSSP)
- Security Operations Center (SOCaaS)
- Managed Detection & Response (MDR)
- Cybersecurity Services (CSaaS)
- Vulnerability Assessment Testing (VAT)
- Penetration Testing (PT)
- Red Team | Blue Team (RT | BT)
- vCISO Advisory

### EMERGENCY SERVICES

- Incident Response (IR)
- Emergency Response (ER)

## OUR MISSION

It is our mission to help organizations protect and grow their revenue by eliminating cyber risk.

## ENGAGEMENT METHODOLOGY

Sniper Watch simplifies your technical business outcome by observing a consistent and repeatable process. We execute a 3-phased approach - Examination, Diagnosis, and Prescription to determine the best in class solution for your business.

## PEOPLE

Sniper Watch employs highly-skilled network infrastructure & cybersecurity analysts & consultants who understand that continuous training keeps our business moving forward.

## PROCESS

We continuously document and create repeatable technology processes so that our deployments maintain industry standard and best in class consistency.

## TECHNOLOGY

We constantly vet out new technology to ensure that our clients receive the best solutions for their business.
